City of Madison Lake **ANNEXATION**

CIC Area

Private service installation started last week. Except one set of services that needed to be bored, service installation is complete on upper Doran Drive. At the time of publication of this newsletter, the crews were at approximately Unit 566 and working westerly on lower Doran Drive. A second crew will be mobilized next week to begin building the road. Road work will begin on upper Doran Drive near Unit 610 and will continue westerly. The plumber will begin contacting property owners next week to coordinate meter installations.

Once the roadway is close to final grade, Xcel Energy will be able to install natural gas main lines. You can apply for natural gas service by filling out an application online or call the Xcel Builders Call Line for assistance with the process at 800.628.2121. Juan Galloway is the Xcel sales representative for the southwest area and will be available to answer questions and provide costs, if any, for the installation of service. Juan can be reached at 651.779.3519.

Nutmeg, Krason, Wheaton, & Clydette Areas

The grinder station pumps, controls, and alarms within the Wheaton cabin area will be installed beginning next week. Utility crews will begin service installations on Nutmeg Road next week (4/13) and will likely begin service installations on Krason the following week. A crew will also be at Duck Lake Park to finish service installations and hook-ups. The plumber will begin contacting property owners to coordinate meter installation soon.

Individuals contracting their own service installations may allow this work to begin. All requirements must be met prior to installation. Notify Shaun Mickelson of ISG when the work will begin.
