City of Madison Lake ANNEXATION

CIC Area

Service installations and hook-ups should be complete later this week. The roadway has been subcut and will be moisture conditioned and compacted next week. The underdrain system installation is planned to begin next week with construction of the new road base following behind. As the road base is constructed, access will be improved.

Time is running out to sign up for natural gas service installation. You can apply for natural gas service by filling out an application online or call the Xcel Builders Call Line for assistance with the process at 800.628.2121. Juan Galloway is the Xcel sales representative for the southwest area and will be available to answer questions and provide costs, if any, for the installation of service. Juan can be reached at 651.779.3519.

Nutmeg, Krason, Wheaton, & Clydette Areas

Utility service installations on Krason Drive will be completed by the early part of next week and grading crews will be mobilized to build the new road base on Krason Drive towards the end of next week.

The controls for grinder stations within the Wheaton cabins area are approximately 50% complete. All hook-ups and meter installations are complete. It is anticipated that fine grading for turf areas will occur next week and the gravel roads will be restored thereafter.

Road work on Nutmeg is anticipated to begin in approximately two weeks.

Individuals contracting their own service installations may allow this work to begin. All requirements must be met prior to installation. Notify Shaun Mickelson of ISG when the work will begin.
